Employee Spotlight:

Robert Cato

Position:

Computer Technician I

Department: IT Department

Years employed with the city: 3 years

What do you enjoy most about working for the city? I enjoy doing what I love to do, and that is working in the IT field. I also enjoy the chance to gain valuable experience and indirectly learn how a government functions and how that affects IT. When you're in IT, you never stop learning, and being around people and helping solve

their problems, while sometimes stressful in the short term, always winds up paying off in the long term.

What changes (if any) have you seen occur in the city over the months/years? Probably the most significant change has been the implementation of a Wide Area Network for the city. This is really a big step forward for us, as it opens up the doors to many solutions; to which we were not able to solve before we acquired this network.
